## DETAILED ACTION

The last two claims presented are both numbered "29". The last claim, therefore, has been renumbered as claim 30.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claim 30 is rejected under 35 U.S.C. 103(a) as being unpatentable over the prior art described at page 1, lines 8-17 in view of the Patent to Godat. The prior art description includes a watch movement with a generator the rotor of which is driven by a spring over a gear train, and an electronic regulating circuit. The Godat reference teaches lubrication with oil of the bearings of the gears of a watch movement (col. 2, lines 28ff). Thus, one of ordinary skill in the art having both references would have a suggestion of providing oiled bearings in the prior art watch/generator described in applicant's specification as a conventional structure of a watch movement gear train.

Art Unit: 2841

The specific type of oil used as lubricant claimed by applicant, being an ozone-resistant type oil would be an obvious choice for one skilled in the art in view of the use of such oils for lubrication. The example given in applicant's specification of Fomblin Z25 is a well known lubricant and one skilled in the art would be familiar with uses thereof for lubricating gear bearings.

2. Claims 1-29 are allowed.
